Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/732,695	Applicant(s) LEVITAN ET AL.	
	Examiner Michael W. Hoyer	Art Unit 2623	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 December 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 8 and 11 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 8 and 11 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 08 December 2000 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/29/05 has been entered.

Response to Arguments

2. Applicants' arguments, see pages 4-5 of the Remarks, filed on December 29, 2005, with respect to the rejection of claims 8 and 11 under 35 U.S.C. § 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made under 35 U.S.C. § 103(a) in view of Rosser (USPN 6,446,261), in further view of Watts et al (USPN 6,324,694), as described below.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 8 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rosser (USPN 6,446,261), in view of Watts et al (USPN 6,324,694), both cited by the Examiner.

As to claim 8, Rosser teaches a communication system and method with demographically defined audiences for providing targeted commercials. The claimed “system for delivery of different versions of the same television program depending on viewer’s information stored viewer’s receiver” is met by Rosser with reference to Figure 4, showing a receiver system storing a demographic profile at 170. A plurality of “basic channels for transmitting primary versions of television programs containing commercials that may be replaced by alternative video fragments for producing alternative versions of those television programs” are provided via sources 134 and 136. Alternative commercials are provided over an alternative video or television feed as taught in col. 13: 13-23. Default programming and commercial alternatives are transmitted to receivers in the network which compare locally stored (170 of Fig. 4) personal profile / demographic data to select a targeted commercial for display (col. 4:31-41). The claimed “means for transmitting over one of said television channels to a viewer’s receiver, a timetable file with descriptive and time/channel data relating to the commercial components of the transmitted television channels and data relating to alternative commercial components which may be used to replace commercial components of said programs” is met by col. 15, line 55 - col. 16, line 10, which discloses that a table is created remote from a user that includes data related to viewer profiles and video indicia or sequences, which are related to the commercial components of transmitted television channels, and the table or “timetable file” is transmitted over a television channel and stored in the user’s device. The table as described above includes encoded data pertaining to where and when to insert video indicia or sequences, which is the

Art Unit: 2623

equivalent of a “timetable”, and the table or “timetable” is transmitted by a video distribution mechanism to a set-top device for storage, where the table is the equivalent of a “timetable file” as claimed. Once a commercial is identified as a match for the local profile, the commercial is substituted “for commercials transmitted with the program material on the selected channel under control of the stored profile of the viewer’s demographic information and said descriptive and time/channel data” as claimed (col. 13:37-40). These commercials are retrieved from local storage 152 and displayed to viewers as taught in col. 13:24-36. Rosser also discloses the claimed “means for allowing a user... to select one channel for viewing” as met by col. 11, lines 27-39, where, “the viewer interacts with their television set via the remote control device 71, or other similar viewer controlled device such as but not limited to, buttons or switches on the viewer set or set top device. The viewer operations of ... channel selection ... and other viewer usage choices are handled by the viewer control interface 148, which may be a graphic user interface displayed on the viewers television or video display. The viewer requests are passed on to the central controller 146, which is typically a programmed micro-processor, as is well known in the art of embedded control technology.” The Rosser Patent does not explicitly disclose the claimed “means for allowing a user to view the descriptive and time/channel data and to select one channel for viewing from said timetable file”, where the “timetable file” acts as an electronic TV guide to allow a viewer to select a channel for viewing from the multiple channels available. However, the Watts et al patent teaches a method and apparatus for allowing a user to view the descriptive and time/channel data and to select one channel for viewing from the timetable file as described in col. 3, lines 47-55; col. 4, lines 23-46; col. 6, lines 10-52; col. 7, lines 8-15; col. 7, line 61 – col. 8, line 7; and col. 8, lines 17-20, where a user may search or view the descriptive

Art Unit: 2623

and time/channel data relating to commercial components or ads of television programs and may also select a channel for viewing from the program guide. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to have combined the Rosser patent with the additional teachings of the Watts et al patent which incorporates the use of an electronic program guide for the advantage of providing the viewer with a program guide or timetable file which uses a graphical user interface that further includes descriptive and time/channel data relating to the commercial components of the transmitted television programs for the advantage of allowing a user to access the descriptive and time/channel data in order to view or modify information related to their own specific viewer profile, as well as to be able to select a channel for viewing from the program guide information. One of ordinary skill in the art would have been led to make such a modification for the advantages given above and since the use of electronic program guides (EPGs) is well known in the art of interactive television distribution systems.

With respect to claim 11, Rosser as combined with Watts, teaches the claimed said means for transmitting a timetable file with descriptive and time/channel data includes such data for the commercial segments which are stored in col. 15:35+ through col. 16:10, as described above, for determining when and which commercial to select for presentation to a viewer.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael W. Hoye whose telephone number is **571-272-7346**. The examiner can normally be reached on Monday to Friday from 8:30 AM to 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Miller, can be reached at **571-272-7353**.

Any response to this action should be mailed to:

Please address mail to be delivered by the United States Postal Service (USPS) as follows:

Mail Stop _____
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Effective January 14, 2005, except correspondence for Maintenance Fee payments, Deposit Account Replenishments (see 1.25(c)(4)), and Licensing and Review (see 37 CFR 5.1(c) and 5.2(c)), please address correspondence to be delivered by other delivery services (Federal Express (Fed Ex), UPS, DHL, Laser, Action, Purolater, etc.) as follows:

United States Patent and Trademark Office
Customer Service Window
Randolph Building
401 Dulany Street
Alexandria, VA 22314

Some correspondence may be submitted electronically. See the Office's Internet Web site <http://www.uspto.gov> for additional information.

Or faxed to: 571-273-8300

Hand-delivered responses should be brought to the Customer Service Window at the address listed above.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to customer service whose telephone number is **571-272-2600**.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

Art Unit: 2623

applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at **866-217-9197** (toll-free).
